DETAILED ACTION

Election/Restrictions

1. Claims 1-10 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected process, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 12 January 2005.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 11-15 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent 4,036,624 to Krohn et al.
4. Krohn et al. teaches a heating furnace for dyeing a lens comprising a frame section 12 forming an enclosed space, a heating section 16 within frame 12, an openable lens insertion port at the bottom 11 of frame 12, a lens holding mechanism 31, and a belt (not pictured) for moving the lens. The furnace further comprises blocks 20, 21, and 23 with different cuts for controlling the heating and cooling of the lens such that as the lens is moved through the furnace on the belt, it is subject to a temperature gradient that produces a color variation in the treated lens; and a mechanism for ensuring the lens moves on the belt through the furnace in a direction normal to the

temperature gradient. Note column 10, lines 1-18; column 10, line 66- column 11, line 24; and Figures 1-3.

Allowable Subject Matter

5. Claims 16 and 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Wedding, Borrelli, Kingsbury et al., and Simms teach similar lens treatment apparatus.
